

Fratelli Boffi collections for the luxurious Black Pearl Resort in Crete, Greece

Thanks to its great ability to work with wood and the experience accrued in its collections developed over the years, Fratelli Boffi has long been committed to the creation of major projects in the world of collective spaces and contract supplies.

The unusual forms of the company's furniture are attentively studied: every curve, every upholstered item and every decorative element is in a balance that brings each individual item alive, both in a collection and as an individual piece.

A significant example of this synthesis achieved is the creation of furnishings for the exclusive **Black Pearl Residence**, the latest and the most luxurious residence of the Capsis Hotel on Crete, in Greece, which came about to satisfy even the most demanding guests.

The Black Pearl, located at the extremity of the private peninsula of the Capsis Hotel complex, is a magnificent villa of 510 square metres completely immersed in green and surrounded by a small lake with a unique view over the Aegean Sea.

The project was completed in 2007 and handled by the **Capsis Internal Studio**, who furnished the interior of this luxurious residence, succeeding in elegantly blending together various pieces chosen from different Fratelli Boffi collections: pieces from the classic collections covered in new materials combined with furnishing accessories inspired by the Oriental world.

The bedrooms are dressed in the **Hanoi collection** inspired by Vietnamese boxes, in the tones of gold or white: the **Haipong** bed, the **Condao** bedside tables, the **Kalam** drawer units and **Mandapa** mirrors, each in their own individual way, furnish soberly and elegantly so as to give ample visual space to nature bursting in through the large glass walls;

In the spacious living zone, however, where two private swimming pools (outdoor and indoor) dominate, are some pieces from the **Chic & Ironique** collection, a "precious" collection that skilfully uses high quality materials: thus the **Aramis** cocktail table with carved legs, surrounded by the **Fantaisie** sofa and armchairs covered in soft brown velvet with "lion's paw" feet with carob finish and the **De Sade** chaise longue, also in the tones of brown with leather covering printed with Baroque design and pure gold finish, as well as giving a feeling of warmth to this environment in which marble and water triumph, making it inviting and elegant.

For the dining room, the **Toutnuit** drawer unit has been chosen, where the mirror acts as covering for the rectangular structure inspired by forms from bygone times, and also, to give even more depth to the room, the **Lumière** mirror, both from the **Nero Corallo Specchio collection**.

In the fascinating setting of Greece and the Mediterranean, the personal style of Fratelli Boffi has never let slip its high standards over time of quality, is the thread running through the various spaces of this exclusive villa where comfort and elegance predominate.
